

Roma Shuliatiev

Product Designer · 5+ years in dedicated product design roles

Kyiv, Ukraine

SUMMARY

Product designer with a development background and 5+ years in B2B SaaS and consumer products. I work end-to-end: discovery, problem framing, workflow analysis, prototyping, delivery, design QA, and post-launch validation with data.

I'm strongest in complex B2B SaaS surfaces: admin panels, tables, forms, settings, customization flows, scalable design systems, and technically feasible UX concepts. At Yesim, I built a token-based design system across three B2B products, making Figma file preparation 4x faster and reducing style-related QA issues by 30%.

I collaborate closely with product and engineering and use functional prototypes with Claude Code to validate UX logic, edge cases, and implementation feasibility. Targeting product designer roles in B2B SaaS, CRM, telecom, and marketplace platforms.

WORK EXPERIENCE

Product Designer – Yesim

Worldwide eSIM store · 3M+ customers · B2B & B2C · Web & Mobile

2021 – 2026

full-time, remote

- Led end-to-end product design across B2B and B2C products: discovery, workflow analysis, wireframes, prototypes, delivery, design QA, and post-launch monitoring.
- Designed complex B2B product surfaces including data-heavy interfaces, forms, settings, customization flows, and reusable UX patterns for web and mobile products.
- Built the B2B ecosystem design system from scratch across 3 products; introduced token-based theming for sub-brand customization.
- Improved design operations and implementation quality: 4x faster Figma file preparation and 30% fewer style-related QA issues.
- Collaborated closely with product managers, engineers, marketing, and stakeholders to align UX decisions with business goals, technical constraints, and implementation feasibility.
- Built functional code prototypes using Cursor and Claude Code, enabling realistic usability testing, clearer edge-case validation, and smoother engineering handoff.
- Ran hypothesis-driven A/B tests on onboarding flows and core features; validated results and next steps using GA4 and BigQuery.
- Conducted moderated usability testing and used qualitative feedback to improve usability, clarity, and task completion.
- Owned UX copy across product microcopy, Help Centre articles, and App Store content.

Product Designer – SMBF

Online reputation SaaS platform · Web

2020 – 2021

full-time, remote

- Designed user flows, wireframes, and interactive prototypes for a B2B SaaS product.
- Wrote and refined UX copy to reduce cognitive load and improve task completion.
- Collaborated with product and engineering teams on iterative releases.

Android Developer, then Product Designer – Eventssion

Event management and ticketing platform · Web, iOS, Android · B2B and B2C · 0 to 50K users

2016 – 2020

full-time, on-site

- Transitioned from Android development (Java) into product design, carrying a technical foundation into every design decision.
- Shaped and maintained a consistent UX across web, iOS, and Android as the product grew from zero to 50,000 users.
- Led a team of 3 designers: set direction and maintained quality standards.
- Designed concepts, user flows, wireframes, and prototypes. Conducted usability studies with end users.

IT Specialist (Internship)

Internal tooling · Enterprise

2014 – 2016

internship, on-site

- Gathered requirements from business analysts and developed and maintained internal software tools.

Score Counter — Android App · Solo project

2016 - Present

Score and tally tracker for board games, card games, and group activities · Google Play

Designed, developed, and shipped a production Android app entirely solo — covering concept, UX, development, and App Store optimisation. Built on Material Design principles.

920K total installs · 90K monthly active users · 4.9 rating · \$0 marketing spend.

Ranked #1 in Google Play search results for core keywords.

108 commits in 2025 alone — grown through regular updates, user feedback loops, and iterative UX improvements.

Paragraphus — Android App · Solo project

2020

Literature discovery app · Built during COVID-19 lockdown

Conceived and built a solo app for discovering world literature by content and theme rather than title or author. Completed during COVID-19 lockdown; not actively maintained.

SKILLS & TOOLS

- Design and product craft
- Product and UX design
- Growth and conversion design
- A/B testing and hypothesis validation
- Design systems and tokens
- Interaction design and prototyping
- Mobile app design (Android, iOS)
- UX writing and content strategy
- Usability testing (moderated)
- UX heuristic evaluation
- Competitor and UX research
- Figma (advanced)
- FigJam
- Cursor and Claude Code
- GA4 and BigQuery
- HTML and CSS
- Android development (Java)
- App Store optimisation

EDUCATION

Specialist Degree in Computer Science · Kremenichuk Mykhailo Ostrohradskyi National University
